

1. When logged as Homeopath, instead of revealing this type of visual. The client wants to have something like the reference before.

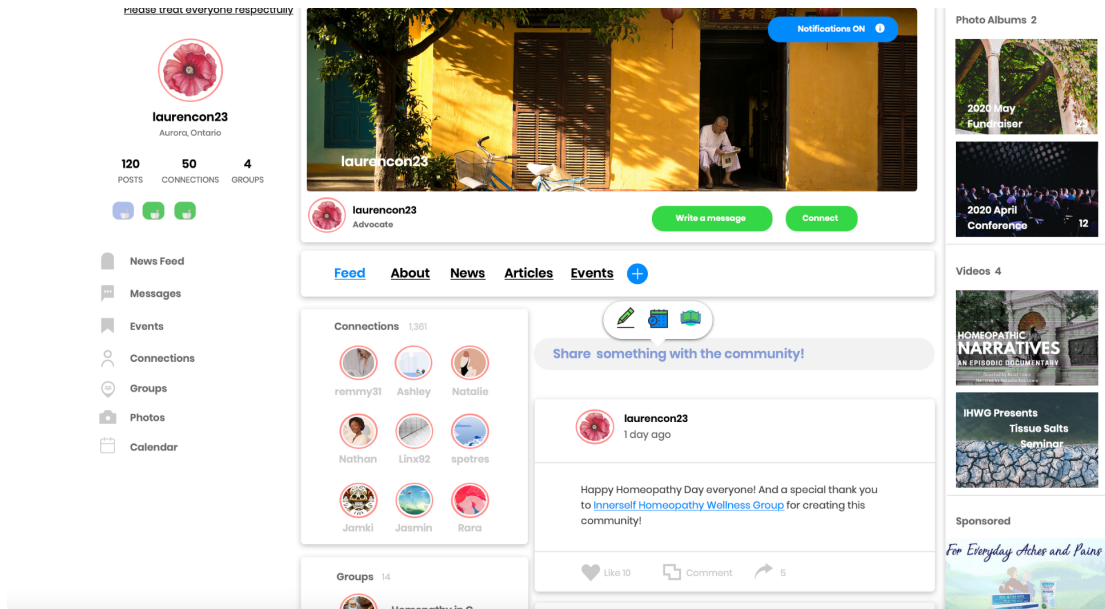

Today

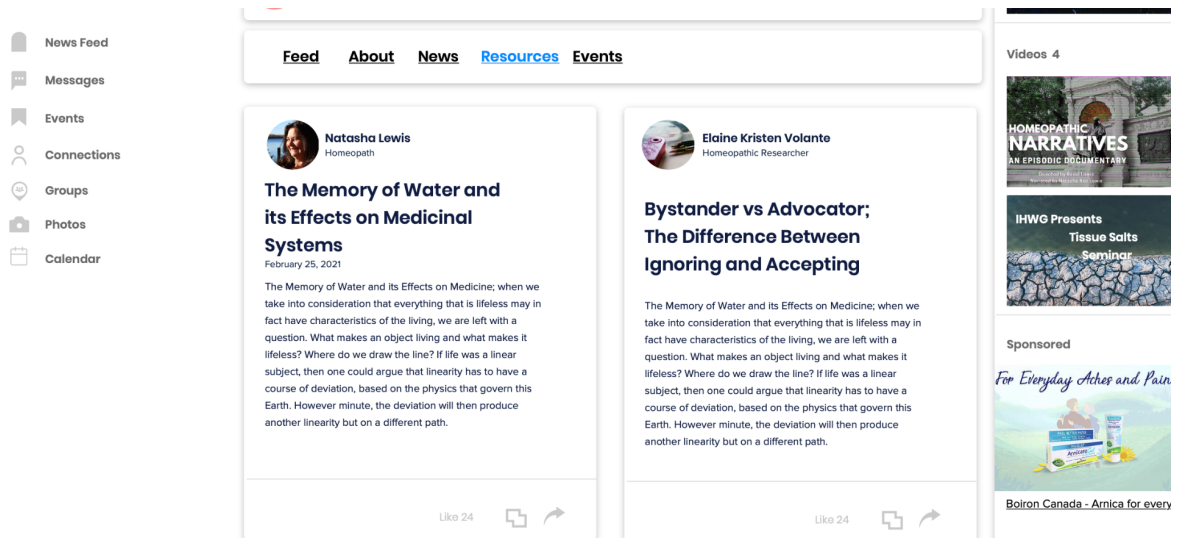

Your account wasn't verified because it doesn't meet the criteria for verification. You can submit another request in 30 days. 2h

2. For the social platform, both homeopaths, and advocates should have the news feed structured and designed like the references before.

Here is how the resources should be formatted

<https://raouloppenheim.wixsite.com/my-site/user-profiles>

<https://raouloppenheim.wixsite.com/my-site/shn-events>

3. In the admin backend, add email functionality to the admin can identify subject, description, able to select bold, italics, fonts, etc.

4. In the admin backend, for Services transactions, this will be the revenue the platform is making. Client wants another finance based category where solely the revenue for the homeopaths can be tracked, and monitored.
5. Client wants a refund feature in the backend for the rare case where money needs to be returned.
6. Add the new zoom feature to all accounts across the platform when entering the dashboard. There should be an option where the user can connect a specific account with zoom. Example: some homeopaths will have zoom pro which uses a different email than the initial one used on the platform.

7. Advocate can only join, and view events. When logged in as an advocate in the dashboard, in regards to the 3 icons at the top of page, remove events. Events will be viewed under “total events organized so far” - this text will be changed to “Events”

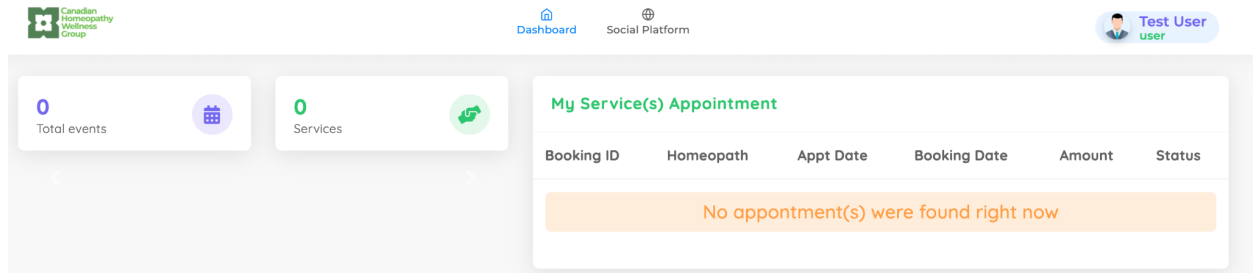

Make the Zoom Box vertically shortened to allow a banner based advertisement on the bottom of the dashboard. Change “Joining requests” to “Connections requests”.

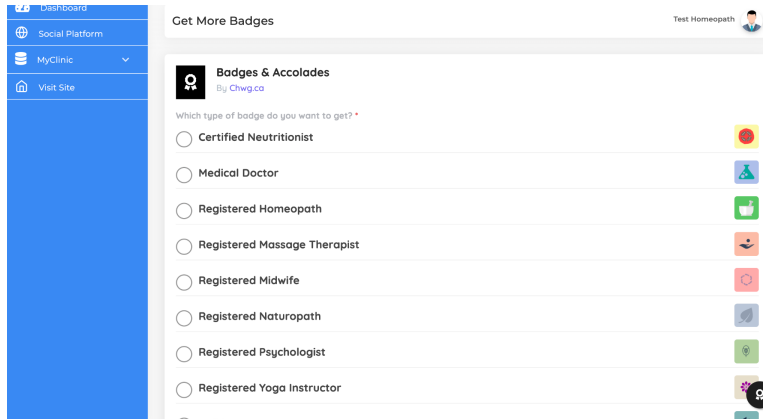

8. Take this feature, move it to the social platform where only the homeopath can access. On the events page next to the already placed 2 icons add a + icon. When selecting +, this prompt pops up where the homeopath can respectively make an event.

9. Add “My Services Appointment” to the advocates dashboard as well. “My Services Appointment” the zoom box prompt will be placed underneath.

10. In reference to this page.

Update this page to more closely reflect the example below, so it will include an image box when selecting the type of badge the image box will change based on the respective icon.

And then the rest that has already been done is fine,

NOTE: Give your correct information in order to approve your request and verify your application. Not all applications are verified. It will depend on your profile and achievements.

At the bottom “Have a medical/wellness certification you’d like to earn a badge for?
Let us know by contacting us.

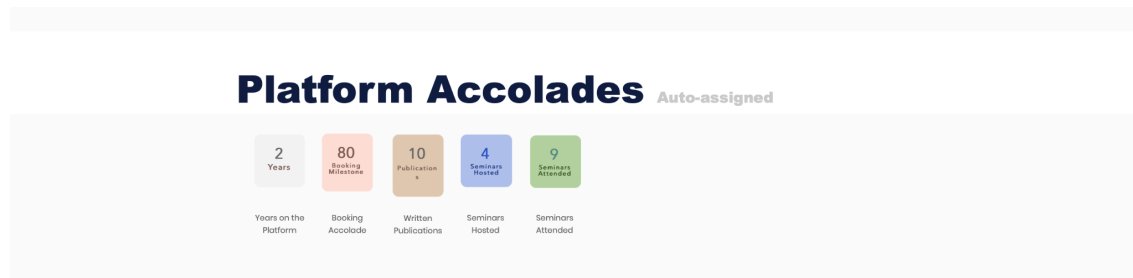

1200 x 950

11. Make the group page on the social platform identify more closely to the facebook group with it's given functionality, and design.

12. Only test users can book right now, any account should be able to access booking whether it's free or paid as long as they have an account.
13. Under the booking options, when selecting a book, this should lead into the booking prompts.

14. These badges are activated automatically, when these are achieved the user will receive a celebratory notification along the lines of congratulation on achieving a new badge. We will start with only these 5 accolades.

15. Homeopaths on the backend are able to manually adjust their hours.
16. Homeopaths on the backend are able to block out any number of days on the calendar. For example if they go on vacation for specified periods at a time. By default, they should follow the Ontario calendar, so any statutory holiday is booked off automatically. In the calendar, when the days are blocked off, it will reveal a visual grey color.
17. Add features where the homeopath can add a break period to their calendar schedule/time into 15 minute increments.
18. Homeopaths should be able to insert their own customers' appointments into their calendar manually.

Thank you team.
